

## A Peer Support Network focused on Employment

Peer support helps people who face barriers to realise their potential. It is about people sharing their experiences to learn from and support each other through challenges and achievements.

Everyone has the right to work and to the support they need to get there. Peer support helps people to build their confidence and take the first steps towards employment.

The Peer Support for Work Network connects people with disabilities and long-term conditions who are interested in employment. It provides a safe environment for them to come together. Peer Support for Work puts people in touch via:

# How to get involved

Anyone with a disability or long-term condition who is interested in employment can join a Peer Support for Work Hub.

Organisations and businesses can also get support to set up hubs that benefit their clients or employees.
